***Carrier Track*** utilizes the power of the internet so you can easily audit discrepancies between what your warehouse believes shipped, and what your carrier actually has record of. Imagine being able to audit all your 'orders in the warehouse' and easily identify those shipments which were given to the carrier; All with a click of a button! Or audit a days worth of shipments to proactively head of any lost packages - *Before they become Customer Service nightmares.*

# Audit Warehouse Shipments - EASILY!

With ***Carrier Track*** from Odin Technologies you:

- **SAVE MONEY -** Eliminate duplicate shipments to customers because you believe a collate was lost. Stop second guessing yourself!
- **SAVES YOU HEAD ACHES -** No more wasted time trying to reconcile the orders in-the-Whse report. Just click to find out which ones are a true discrepancy!
- **AUTOMATICALLY GENERATE A BATCH SHIP FILE -** ***Carrier Track*** identified the shipments that need to be ship confirmed, why manually do it? Just click a button and run!
- **CREATE A STRONGER WAREHOUSE IMAGE -** Now your warehouse has an auditing tool to identify potential problem areas. They can audit their work proactively and feel good about it.
- **INCREASE CUSTOMER SATISFACTION -** Your customers will be happier.
- **MORE CONFIDENT SHIPPING -** Now when the system says 'SHIPPED' you can feel confident the package is on the way to the customer.
- **VISIBILITY TO CARRIER ISSUES -** With ***Carrier Track*** you can identify those 'lost' packages before the customer contacts customer service.

**Supports all major carriers: UPS, FedEx*, and USPS**
